SKILLS

Languages

Typescript, Javascript, PHP, HTML, CSS

Tools

Node.js, Express, Laravel, React, Vue.js, Tailwindcss, Pug

Databases

MySQL, PostgreSQL, MongoDB

DevOps

Google Cloud, Vercel, Github Actions, Docker

PROJECTS

Chat App

[Github](#)

Laravel, Vue.js, Typescript, PHP, EloquentORM, Pusher, Backblaze

[Live](#)

- Built a webapp where users can chat privately, or in groups through join requests
- Built a notification system tracking unread messages
- Used Pusher to dispatch Websocket events to private channels
- Ability to send files and images, stored on backblaze
- Developed a subscription service to create more than 5 groups and other perks, powered by 2checkout gateway

Form Builder

[Github](#)

Node.js, Express, Next.js, React, PostgreSQL, Typescript

[Live](#)

- Developed a CMS app for building forms, shared using URL for users to fill
- Used React to build a robust drag and drop interface for building forms
- Built REST API with Express on Node.js with PostgreSQL

E-Store

[Github](#)

Laravel, Blade, Typescript, PHP, EloquentORM, Backblaze

[Live](#)

- Developed an e-store where users can browse and order products online.
- Built a dashboard for managing products, categories and examine orders
- Implemented dynamic filtering for categories, populated by product specifications
- Built a search system that searches products' name, type, and specifications
- Added trader accounts for ordering in wholesale prices, requiring admin approval
- Built a tool for users to build a security cameras system out of compatible products based on their needs, and bundling it in an order

CERTIFICATES

Software Engineering

Suez Canal University | 2022 - 2025

Professional Front-End Web Development

Udacity | 2022
