Languages	Typescript, Javascript, PHP, HTML, CSS
Tools	Node.js, Express, Laravel, React, Vue.js, Tailwindcss, Pug
Databases	MySQL, PostgreSQL, MongoDB
DevOps	Google Cloud, Vercel, Github Actions, Docker

WORK EXPERIENCE

DHCB

April 2025 - Present

Full-Stack Laravel Developer

- Built and maintained production-ready Laravel applications across multiple tech stacks in collaboration with a multinational team.
- Integrated third-party services such as Checkout, OneSignal and AWS S3 within PHP and Javascript back-end systems.
- Built and integrated workers and queues to handle background tasks efficiently, significantly reducing response times and optimizing overall system performance.
- Refactored a legacy system into an MVC structure using SOLID and DRY principles.

PROJECTS

Chat App

Github
Live

Laravel, Vue, Typescript, PHP, EloquentORM, Pusher, Backblaze, OneSignal

- Built a webapp where users can chat privately, or in groups through join requests
- Built a notification system tracking unread messages
- Ability to send files and images, stored on backblaze
- Developed a subscription service for extra perks powered by 2Checkout gateway

Form Builder

Github
Live

Node.js, Express, Next.js, React, PostgreSQL, Typescript

- Developed a CMS app for building forms, shared using URL for users to fill
- Used React to build a robust drag and drop interface for building forms

E-Store

Github
Live

Laravel, Blade, Typescript, PHP, EloquentORM, Backblaze

- Built a dashboard for managing products, categories and examine orders
- Implemented dynamic filtering for categories, populated by specifications
- Added trader accounts for ordering in wholesale prices
- Developed a security system Builder, bundling compatible products in an order

---

CERTIFICATES

Software Engineering

Suez Canal University | 2022 - 2025

Professional Front-End Web Development

Udacity | 2022
